

J. SCOTT ZUMWALT

Experienced and Effective Software Developer

scott.zumwalt@gmail.com

512.817.8513

San Marcos, Texas
(Open to Relocation)

Summary

Well-rounded problem solver, with a record of proven responsibility and dependability. Passionate about technology and helping people use technology to enhance their lives and mission effectiveness. Excellent communication skills, highly proficient at translating business needs to technical implementation. Empathetic leader capable of keeping a team on-task and motivated.

Education

Thomas Nelson Community College

SEPT 2005 - MAY 2007 (HAMPTON, VA)

- Associates of Applied Science in Computer Science.

Skills

- Leadership, Project Management, Mentoring
- Object Oriented Programming
- Strongest with C#/.NET (WPF, WinForms, backend web APIs), SQL/MySQL, Python, HTML, and CSS
- Experience in C++, Java, JavaScript/Typescript, React, ASP, native Android, GitHub CI/CD, and Azure

Experience

XDR RADIOLOGY

AUG 2010 - JUNE 2024 (LOS ANGELES, CA [REMOTE])

Software Development Manager (Oct 2014 - June 2024)

- Developed architecture for next generation of dental radiography software suite utilizing web-based API services.
- Created functional and technical specifications based on communicated user needs and dictated desires from company leadership.
- Managed tasking of a team of seven individuals on creation and maintenance of all software for the company.
- Executed interviewing and hiring of new programmers to expand team.
- Mentored team with skills development.

Senior Developer (Jul 2012 - Sept 2014)

- Modified XDR software to use MySQL backend instead of flat-file Paradox database. Software stability and customer satisfaction increased while technical support calls decreased.
- Integrated new x-ray capture device SDK to allow third-parties to make use of our sensor. Expanded business by 15% and increased sales of sensor by millions of dollars.
- Created system of database synchronization to enable multiple office locations to share data over unreliable data links.
- Mentored junior developers on skill enhancement and common practices.

Junior Developer (Apr 2011 - Jun 2012)

- Identified key areas of improvement company and product-wide and implemented custom software solutions.
- Created third-party software integrations to allow patient data bridging to XDR Software. This increased customer satisfaction with our software and removed XDR costs and dependency on previous third-party integration.

Old Dominion University

SEPT 2007 - MAY 2009, AND JAN 2025 - CURRENT (NORFOLK, VA)

- Bachelor's in Computer Science.
- Currently pursuing Master's in Computer Science

- Created bespoke ticket managing software tailored to company needs. Tech support and customer service efficiency increased dramatically and allowed much quicker handling of customer issues.

Technical Support Agent (Aug 2010-Mar 2011)

- Provide technical and training phone support for XDR software.
- Implemented system of scripts to automatically fix common issues immediately upon connection to customer computers.

UNITED STATES AIR FORCE

MARCH 2003 - MARCH 2009 (LANGLEY AFB, VA)

Support Specialist (Mar 2007 - Mar 2009)

- Lead and trained subordinates in work related skills.
- Developed repair guidelines for specialized rugged laptops, saved AF over \$150000 in repair costs by training individuals to repair laptops in-house.
- Maintained 100% inventory on \$2.2 Million worth of assets.
- Managed hazardous materials program by ensuring compliance with OSHA and AF regulations, order, and track consumption of hazardous materials.
- Tracked unit vehicles for serviceability and ensured proper licensing of authorized individuals for specialty vehicles.
- Tracked, repaired, shipped, and received aircraft maintenance equipment.

Weapons Load Crew Member (Mar 2003 - Mar 2007)

- Position, load and unload non-nuclear munitions onto F-15/F-22 aircraft.
- Install, maintain, and troubleshoot aircraft armament systems.
